WHY WE EXPAND.

Explanation of the Working of Providence in the Late war.

[BAPTIST WEEKLY STANDARD.]
Q. Why did the United States go war with Spain? A. To help the

Cubans

Q. What was the matter with the Cubans? A. Spain would not let them be independent.
Q. What else? A. Spain treated

the inhabitants cruelly in trying to

the inhabitants crucily in trying to suppress rebellion.

Q. How did the war result? A. Spain was badly defeated.

Q. Why was she defeated? A. Because we had better guns and

better men to aim them

Q. When the war was over, what did the Government do for the Cubans? A. Not much of anything, except to allow charitably disposed citizens to feed a few of the starving

Q. Then the war was not an entire success? A. Oh. yes. for it opened a way for us to expand.
Q. Why did we need to expand?
A. Because there was not room enough in the United States for all the nolliticians who wanted inly the politicians who wanted jobs. This is not the reason usually pub-

Q. How did it happen that the op portunity to expand came just at the time when it was needed? A. Some say it was providential

Q. How can we be sure that it was providential? A. Because bewey sunk one Spanish fleet without losing a man and Schley sunk another with the loss of one killed.

Q. What does that prove? A. It proves that it is our manifest duty expand.

Chambertain's Cough Remedy.

This remedy is intended especially for coughs, colds, croup, whooping cough and influenza. It has become famous for its cures of these diseases, over a large part of the civilized world. The most flattering testimouniants have been received, giving accounts of its good works; of the aggravating and persistent coughs at vielded promptly to its soothing of lects, and of the dangerous attacks of croup it has cured, often saving the life of the child. The extensive use of it. for whooping cough has shown that it robs that disease of all dangerous consequences. It is especially prized by mothers for their children, as it never fails to effect a speedy cure, and because they have found that there is not the least danger in giving it, even to babies, as it con tains nothing injurious. CONTRACTOR OF THE PACE NOTE.

WILL THEY RESIGN.

Election Commissioners Will De mand an Endorsement.

Messrs. Pryor, Ellis and Poyntz all owe their election, as election commissioners, to the Democratic commissioners, to the Democratic members of the last general assembly. They were elected to put into effect the new election law, and all Kentucky stands ready to testify that they did it in such a manner as to challenge the admiration of voters of all politics. From one end of Kentucky to the other, the word went out, after the first trial of this election law, last November, that there had never been such a fair there had never been such a fair election in the state. Not a single complaint of fraud, by the operation of this law, has been made. Nevertheless, it has been the subject of constant attack by the Republican and gold standard press, and the Republican state convention in its platform will condemn it and en-deavor to make its repeal a leading ssue of this year's campaign.

If the Democratic convention does ot endorse and defend it, we have it on the highest authority that a least one of the state election commissioners, Wm. T. Ellis, (who by the way, will be a delegate in that convention), will instantly resign.
We are not advised as to what
course Messrs. Pryor and Poyntz will pursue, but it is quite safe to predict that Mr. Ellis will not be

alone in the action he takes.

However, there is no doubt whatever but that the Democratic state convention will endorse the election law.-Owensboro Messenger.

Poultry Express Charges.

A coop made of wood slats, and firm, lined inside by tacking on canvas, containing five birds, weighing only forty-seven pounds, and billed from the place of shipment with \$1.25 charges, was re-ceived in Indianapolis, its destina-nation. After its arrival, the agent at Indianapolis doubled the rate and collected \$2.50 express charges

On inquiry at the office of the ex-press company, we were informed that the canvas in the coop caused the doubling of the rate and they gave us a copy of their instructions from the company, viz: "If cloth covering is used, will be

"If cloth covering is used, will be double merchandise rate. Use nothing but wood in your coop." This is a distinction without a difference, but as long as cloth gives them an excuse for doubling the rate, although it does nothing towards strengthening or support-ing the coop itself, still they take Hence it is wel advantage of it. for those who ship birds from on point to another to make their coops wholly of wood, and thus secure one or merchandise rate, otherwise the chances are that the consigner will be compelled to pay "double

We have looked into this cas carefully and therefore give this advice intelligently, and find that the companies' instructions to their employees are so general that any cranky express hand, who bills or receives the goods, can charge double rates if cloth is used in the construction of the coop, even to the lining of the same to keep out frost or to prevent them from putting or to prevent them from putting their heads out, as in this instance. the cloth only served for such purpose, and there is no show for recting the same so long as the charges.

It is due to the Express Company to state that on returning the above mentioned coop to the ex-press office, and showing that the cloth inside did not enter into the construction of the coop, but was placed inside by tacks to protec the birds from cold, that \$1.25 was returned to the consignee. All are not as fortunate, hence to be make the coop entirely of Fancier's Gazette.

The French thung away the imprial eagle in 1870. Emperor William seems to have taken up this art of prey, at any rate, for a decration of the Hohenzollern. Prof. alandrelli, the Paris correspondent or the London News says, has executed for him a givantic propal earlier. Calandrelli, the Paris correspondent for the London News says, has executed for him a gigantic spread eagle in repousse brass. The bird holds forked lightning in its talons, and measures eight vards nine inches at the wing tips. It will be perched on a console projecting from the prow of the emperor's yacht. The Roman eagle was raised from the dead by Napoleon when he thought of adding the kingdom of Itlus to the goicen when he thought of ador-ge the kingdom of Italy to the rench republic. It figured, but al-ays in the plural, in his addresses his soldiers on the eve of battle or the morrow of victory. The eagles that is to say, the French standards were represented as flying over Eu-pe. In 1815 the eagle ceased to be rope. In 1815 the eagle ceased to be the heraldic bird in France. Louis Philippe adopted the cock for the national emblem.

national emblem.

In 1852 the eagles were revived by Louis Appoleon, to be massacred on September 4 and the two or three following days. It was present at some massacres of engles at the Tuileries and the Elysee. Each massacres took place to the accompaniment of fervid oratory and imprecations. The cargles then were "des sales oiseaux de proie," and the symbol of defeat. The heraldic cock came in again, but has been irregularly used. It is of Gallic origin. Gallus was a cock, whose crowing kept the neighborhood awake. The cock was a good emblem of that Louis XIV, and Napoleonic policy which would not suffer any heighbor to be equal with France, nor to approach her in greatness. There was a deal of the game cock in the spirit of French chivalry and the military instincts of the French nobility. In 1852 the eagles were revived by

Which is the Best General Pur pose Fowl.

Those who have been associated with the breed and have learned of its character sufficient to care for them and give them the condi-tions under which they will do their best, need not another word to complete this essay and answer the above question.

Best general purpose fowl! Do we not mean that fowl that fills to a we not mean that fowl that fills to a greater degree all the demands for family uses and gives us the greater food supply for the family? We say "Yes" and that question can be answered by its home consump-

Its home consumption or its worth for market—it all results as

a food supply.

First. We say it is the hardiest of all known breeds. The death rate in the adult stock is less than

any other.
Second. It produces the larges number of pounds of meat for number of pounds of meat for the food consumed, first as a profiler at two months old, when they will weigh four pounds to the pair. It is a plump, fat specimen from its very birth to this age, giving us a weight at eight weeks that the American class must have twelve weeks to secure. At six and a half veeks to secure. At six and a half o eight months it gives the largest per of pounds for food con-

where the males, kept in celibacy remain in a condition to roast ten er and juicy up to its twelfth nonth, making it about the only creed that can be fed through the winter months with profit, thus enabling one to kill and market as heavy roasters at such times as the market is firm. It commences to lay at an average of six and a half months old. It lays 1-12ths of its months old. It lays 1-12ths of its eggs in the five coldest months in the year. Its eggs are the largest of all breeds, weighing the most, giving a larger weight of eggs per capita—24 15-16ths lbs. in large flocks, while individual specimens reach 37 ounces per dozen. We can show scores of pullets that have been hatched from such. Their record in flocks yeary from 155 Their record in flocks vary from 155 to 195, an average of three parties flocks of 25, 35 and 75 birds in the flocks being 160 11-15ths, 161 and 168½. Individual specimens have produced 192, 195, 225, and one we lave sworn to under oath at 318 ggs in 333 days, which was the ull record for her. Then we say, ne woman has produced 22 chick-

ens to 53 10-16ths lbs. in 61 days and the same flock at 100 day's old to weigh 107 lbs. thus doubling and the same flock at 100 days out to weigh 107 lbs. thus doubling their weight in 39 days. They have records of 92, 105½, 107 and 110 eggs when one year old. Four pens eggs when one year old. Four pens cooped for breeding purposes March 1st, 1898, in five months laid an average of 105 eggs per capita. These eggs being 25 per cent, heavier than most breeds' eggs, makes them just that much nore valuable as the sustaining

ood for the family.

The farmer, then to get the very nost out of the breed for purely itchen uses must treat them as he oes his crops—hatch his chickens early, kill the males at eight weeks old as broilers, or when six to eight nonths old, to secure the best re-sults for meat for the grain he feeds and the care he expends upon them force the females to lay till they are half feet across the hams and six

The objections to the other varieties of Lephorns are that the pullets' eggs are too small and the tes of Legiorns are that the pur-lets' eggs are too small and the cockerels are harder to fatten, while with the Buffs it is viceversa. Their eggs are great for fertility, some often hatching 100 per cent. I have never had any to hatch be-low sevents for low seventy-five.

There are several breeds of Buffs

viz., the Buff Plymouth Rock, Buff Cochin, Buff Wyandotte, but none can compare with the Buff Leghorn, our general purpose fowl,

There are 123 young ladies from arious parts of the West in attendance at Omaha's aristocratic sem dance at Omana saristocratic seminary for young women. Brownell Hall, and 115 of the students are at present walking on crutches. In fact, tor the present the seminary is a walking hospital, and two wagon loads of crutches have been

sent there within the past few days.

The trouble is the result of an experiment the young ladies indulged in which reference to being vacci-nated. After long deliberation, they selected the right leg, and are for the time being cripples.

The Biggest Hog.

The largest hog ever raised was ecently slaughtered in New York The animal was a Jersey Red boar the animal was Jersey Redboar two and one-half years old, weigh-ing alive 1,609 pounds, and dress-ing 1,336 pounds. The National Provisioner has the following to say of the prodigy: "This huge swine measured over nine feet from the tip end of its nose to end of its tail. It measures two and one-half feet across the loins, two and onethey cease to lay at moulting, and then turn them off as poultry, never the shoulder, and to look into the keeping old and young in the same flocks. From hip bone to toe it meas-ures 3½ feet, and about the same from the crest of the shoulder blade to the bottom of the foot. Thegreat fat jowls extend nearly two feet across. From between the ears to the tail is over seven feet. The tail itself is the smallest thing in the big proportions. It is a mere point in the air. The face of the hog is also small for the size of the animal. It is only sixteen inches long. The hams are monsters in long. The hams are monsters in size, and the vast stretch of pork in the long waist is borne just above the ground by four comparatively small feet. The usual porker is a mere pigmy by its side. The biggest hog heretofore grown weighed 1,250 pounds dead weight." A CLEAR HEAD;

SEASON OF 1899.

To Our Friends: Another season of seed time is fast approaching, and the wise and prudent farmer will again use the old and favorably known JONES BRANDS or BONE AND ANIMAL MATTER FERTILIZERS, that have for many years done their full duty when applied to both Spring and Fall crops. The use of commercial Fertilizers is almost universal, and the experience of many years has proven conclusively that ANIMAL MATTER FERTILIZERS are the most complete plant food known, and the fact of putting ACID PHOSPHATE ROCK in a bag and branding it 'DISSOLVED BONE' does not make it animal matter. Honest strictly pure Animal Matter Fertilizers cost more than rock goods because they are worth nore, and we sak that you remember this fact. Our goods go out under our guarantee analysis, and this guarantee is good. We offer our goods on their merits, and refer with great satisfaction, to their most excellent reputation in all parts of Ohio, Indiana, and Kentucky, where they are extensively used. We respectfully urge you to give the celebrated Jones Fertilizing Co.'s goods a trial on both Spring and Fall crops, and we know satisfactory results and future orders will certainly follow.

REAR END COLLISION.

Bad Wreck North of Town Sun-

Several Hours.

What is known in railroad circles what is known in raintoactricts as a "rear end collision" occurred on the L. & N. near Chalybeate Springs at 8,30 o'clock Sunday morning. A south-bound through freight which had stopped for repairs on the engine, was another freight train, also south bound, and the engine and three cars of the rear train were ditched The engineer and fireman jumped and none of the train men were hurt. The caboose of the train standing still was crushed and is a complete wreck.

The engine was thrown on its ide and badly damaged. The side and badly box cars which left the track were loaded with merchandise, which

was strewn in every direction.

It seems that when the engine of
the first train gave out a flagman
was sent back to flag downthe train which followed, but he was unable to get sufficiently far away from his train to stop the second section be-fore in was too close upon the first to avoid a crash.

The loss to the railroad company

will probably foot up several thou-sand dollars. The wreck caused a delay of twelve hours to the north bound St. Louis tast mail and the south bound passenger, due here at 5:27 p. m., was also delayed several hours before the wreck could be cleared away.
